

TABLE OF CONTENTS

List of Figures	v
List of Tables	x
Preface.....	xiii
Acknowledgements.....	xv
Abbreviations.....	xvi
1 General Introduction	1
1.1 The Central and Southern Florida Region	1
1.2 Historical Background	5
1.3 Model Characteristics	9
2 Physical and Hydrologic Components.....	19
2.1 Topography and Land Use.....	19
2.1.1 Topography	19
2.1.2 Land Use	28
2.2 Rainfall.....	39
2.2.1 Quality Assurance/Quality Control of Rainfall Data.....	39
2.2.2 Transformation to Grid-Based Data Set	43
2.3 Evapotranspiration	47
2.3.1 Determination of Potential Evapotranspiration	47
2.3.2 Lake Okeechobee Evapotranspiration	54
2.3.3 Everglades Agricultural Area	56
2.3.4 Non-irrigated Areas	56
2.3.5 Irrigated Areas in the Lower East Coast	60
2.4 Overland Flow	67
2.4.1 Governing Equations	67
2.4.2 Model Implementation.....	69
2.5 Subsurface Flow.....	75
2.5.1 Infiltration and Percolation	75
2.5.2 Canal-Groundwater Seepage	75
2.5.3 Levee Seepage	76
2.5.4 Groundwater Flow	80
2.5.5 Model Implementation.....	83
2.6 Canal Routing	91
2.6.1 Basic Principles.....	91
2.6.2 Profile Slopes in Canals.....	93
2.6.3 Canal Water Budget.....	95
2.7 Initial and Boundary Conditions.....	97
2.7.1 Initial Conditions	97
2.7.2 Boundary Conditions for Lake Okeechobee.....	97
2.7.3 Other Boundary Conditions	104
3 Policy and System Management Components.....	113
3.1 Lake Okeechobee.....	113
3.1.1 Introduction.....	113
3.1.2 Lake Okeechobee Water Budget	114

3.1.3	Lake Management Processes	115
3.1.4	Lake Interaction with the C-43 and C-44 Basins/Estuaries	124
3.1.5	Lake Management Algorithm	127
3.2	Everglades Agricultural Area	129
3.2.1	Introduction.....	129
3.2.2	Simulation of Everglades Agricultural Area Runoff and Demand.....	132
3.2.3	Routing of Excess Runoff.....	140
3.2.4	L8 Basin, S236 Basin and 298 Districts	147
3.2.5	Everglades Agricultural Area Reservoirs and Storage Components	147
3.3	Lake Okeechobee Service Area	153
3.3.1	Introduction.....	153
3.3.2	AFSIRS/WATBAL Model Overview.....	153
3.3.3	Caloosahatchee and S4 Basins.....	156
3.3.4	St. Lucie Basin and Florida Power & Light Reservoir	158
3.3.5	Lower Istokpoga Basins.....	158
3.3.6	North and Northeast Lake Shore Basins.....	158
3.3.7	Seminole Brighton and Big Cypress Reservations	159
3.3.8	Supply-Side Management for Lake Okeechobee Service Area.....	160
3.4	Everglades Protection Area.....	163
3.4.1	Introduction.....	163
3.4.2	Model Implementation.....	173
3.4.2.1	Operating Rules	173
3.4.2.2	Environmental Deliveries	184
3.5	Simulation of the Lower East Coast of South Florida	193
3.5.1	Introduction.....	193
3.5.2	Water Supply Needs Calculations	193
3.5.3	Unsaturated Zone Accounting in the Lower East Coast.....	201
3.5.4	Water Shortage Plan for the Lower East Coast	203
3.5.5	Public Water Supply Well Pumpage.....	207
3.6	Storage and Additional Management Options	211
3.6.1	Storage Options.....	211
3.6.2	Additional Management Options.....	217
4	Calibration and Verification	225
4.1	Calibration of the Everglades Agricultural Area Basin	226
4.1.1	Methodology	226
4.1.2	Everglades Agricultural Area Calibration and Verification Results.....	229
4.2	Calibration and Verification of the Everglades and the Lower East Coast	241
4.2.1	Methodology	241
4.2.2	Calibration and Verification Results.....	248
4.3	Calibration Overview of Lumped Lake Okeechobee Service Area Basins	263
4.3.1	Calibration of the Caloosahatchee River Basin	263
4.3.2	Calibration of the Brighton Seminole Reservation and Lower Istokpoga Basin	270
4.3.3	Calibration of the Big Cypress Seminole Reservation and Feeder Canal Basin	274
5	Sensitivity Analysis	279
5.1	Methodology	279
5.2	Results of Sensitivity Analysis	281

References..... 289

Glossary 299

Appendices

Model Application Information CD Only

A. Inputs and Outputs For the SFWMM v5.5	
B. UNIX Manpages for the SFWMM v5.5 Input Files	
C. Calibration and Verification Figures for Everglades and LEC System	X
D. Quick Reference Spreadsheet for Input Files	X
E. Lake Okeechobee Interactions Spreadsheet	X
F. SFWMM Process Flow Charts	X

Model Development Information

G. Improvements Incorporated into the SFWMM v5.5	
H. Call Tree Flow Chart for the SFWMM v5.5	
I. Subroutine Descriptions for the SFWMM v5.5	
J. Detailed Processing Description for the SFWMM v5.5	X
K. Source Code for the SFWMM v5.5	X
L. C Program TIN-10 Application to Rainfall	X

Technical Memoranda

M. Development of the Topography Data	X
N. Upper Kissimmee River Basin Model Technical Memorandum	X
O. Public Water Supply Memorandum	X
P. Preparation of Rainfall Data	X
Q. Brief Description of AFSIRS Model	X
R. Development of the Reference ET Data Set	X
S. Determination of the FLI, FGI, and FLR Parameters	X
T. Development of Land Use Data	X
U. Development of the LEC Et-Recharge Data	X
